COM YARDAGE:

781-10: 6 yards for every chair (based on no repeat, non-directional material)

781-20: 14 yards for every settee (based on no repeat, non-directional material)

781-30: 18 yards for every sofa (based on no repeat, non-directional material)

SPECIFICATION:

- Chair frame shall be constructed from solid kiln dried hardwood. Lumber to be dried to a final moisture content level between 6% - 8%.

- Front and rear legs to be constructed from 2" x 2" solid wood. Leg is attached to the hardwood frame frame via threaded bolts. Visible wood is finished in any standard ISA wood finish and clear coated in a low-gloss urethane. Legs included nail-in nylon glides suitable for most flooring types.
- The frame components are connected together by dowels, corner blocks, screws and glue.
- The seat is built of webbed construction. High density CAL 117 FR foam is applied. The seat cushion foam thickness is 5"; Dacron is added on the entire upholstery area. Upholstery is applied as specified.
- Back and seat upholstery is done in a pull-over method, glued and stapled to the frame.
