SPECIFICATION:

- Frame shall be constructed from 16 gauge square metal tubing $\frac{7}{8}$ " x $\frac{7}{8}$ ".
- Frame components are bent and welded together with 4 seat mounting tabs. The frame is then strengthened with an additional 2 side stretchers.
- Bottoms of legs are capped with heavy duty metal, shock absorbing swivel chair glides. Alternate glides may be used depending on the type of flooring at the project site.
- The upholstered seat shall be 1½" thick box style. There is an optional solid maple seat with saddled form that can be specified. The seat is attached to the metal frame with screws. The foam is an extra firm 2 pound density.
- The back is solid maple with curved form for comfort. The back is then glued onto pronged uprights with heat frequency glue that is suitable for wood and metal to form a strong non removable bond.
- Seat and back solid maple components are prefinished in any of ISA's standard wood finishes and sealed with a catalyzed lacquer.
- Metal frame finishes available in any of ISA's standard powder coat finishes.
